Mason Corporation incorporated April 1, 1948 as Southeastern Tool and Die Company, Inc. At that time the company operated principally as a tool and die shop, building special tooling and machinery for other companies. On February 15, 1969, the company name was changed to Mason Corporation in honor of our founder, Samuel L. Mason. At the time of incorporation, the company occupied less than 2,000 square feet of rented basement space. Today, the company's main office in Birmingham, Alabama has a total of 182,000 square feet, with six other warehouses throughout the United States, totaling 212,000 square feet.

In 1948 there were less than ten employees and today the company provides employment for approximately 175 persons in 17 states. The company's beginning product line consisted of one window screen frame, one round aluminum spline, and one corner insert – just three items. Mason now offers more than 2,600 items to the light commercial and home improvement markets.

In all arenas in which we participate, Mason Corporation will strive to become the standard by which all others are judged.
